DIRECTIONS

- Wear safety equipment recommended on MSDS. Read all directions and cautions prior to beginning work. Remove loose soil and garbage. Before cleaning floors, place Wet Floor signs near work area.
- Dilute Control with water as follows:
 - Heavy soil: 5:1 (26 oz per gallon)
 - Moderate soil: 20:1 (6 oz per gallon)
 - Light soil: 50:1 (2.5 oz per gallon)
- Apply to surface liberally while scrubbing. Allow to work. If soil is heavy, double scrub with an auto scrubber (First pass, squeegee up; second pass, squeegee down, vac on). Pick up as much solution as possible. If possible, allow floor to dry before traffic resumes on cleaned area.

*Available in sizes:
2.5, 55 gallon and tote containers.*

PROFESSIONAL RECOMMENDATIONS

- Use this product regularly for best results
- Use “grit” type brushes on your autoscrubber to enhance cleaning on unfinished concrete and other industrial floors.
- Overlap your cleaning passes to assure uniform cleaning and “double scrub” when heavy soil is present.
- When mop cleaning, change cleaning solution frequently to get peak performance. Do not let mop rest in cleaning solution between uses.
- Not recommended for removal of baked-on or dried, hardened soils; use a cleaner that is solvent fortified.
