

# DIVIDED BUCKET SYSTEM

The NuFiber Divided Bucket System offers a solution to end dirty mop water. It is still a traditional size, but includes a fixed divider that guarantees the rinse water will not contaminate the clean chemical solution, allowing for better cleaning.

## Features and Benefits

- Dependable fixed divider eliminates any chance of solution transfer from one side to the other
- Easy mop access under wringer due to crescent shaped divider
- Available with a down press or side press wringer for mop style or personal preference
- Polyethylene construction and recessed caster wheels for durability and easy transport
- 3 color coded, chemical resistant task labels included with each bucket to match facility cleaning programs
