All of our cloths are 300 gsm and have rounded corners for extended life. Cloths for glass and mirrors, for the auto detailing industry, color coding options, and other specialty cloths are also available. The NuFiber High Duster Kit allows for effective and easy high dusting without the need for a ladder or lift. Unlike some traditional polywool or feather dusters that merely flick the dust into the air, the NuFiber High Duster grabs and holds the dust. Also part of the kit, the telescopic handle allows for dusting up to 11'. Additional adaptors and handles are available for dusting up to 25'!

Compact Cart With Trash Receptacle

24"x24"x24" - Includes vinyl trash receptacle
(in replacement of the dirty mop basket), metal
wire tool basket, blue 6-gallon sealed bucket, and
gray 6-gallon sealed bucket.

Reduces chemical consumption by an average of 70% while enhancing the level of clean. It is best for light to medium soil. No traditional mop bucket, no spreading of soil, and no trips back and forth to dump dirty water. If the primary goal is little or no cross contamination while mopping, then this system is the obvious choice.

DIVIDED/DOUBLE BUCKET SYSTEM

The Divided or Double Bucket Systems are dramatically enhanced versions of the traditional single cavity mop bucket. Both systems are flexible in that they can accommodate either tab mops or tube mops while separating the clean chemical solution from the rinsing water. You will always be mopping with clean chemical solution.

FLOOR FINISH, WALLS, COUNTERS, DESKS, WINDOWS

The Floor Finish applicator system is perfect for small areas and for large hallway finish application. This system, is versatile, efficient and ergonomic. It applies a perfect layer of sealer or finish on the floor streak-free! Many flat surfaces above the floor that can be best maintained with microfiber and specialty tools. Using a bucket of water with a sponge or rag is both ineffective and cumbersome. Nufiber offers an array of frames and handles to make the job faster and easier.

The Nufiber Dust Mop series is the best way to effectively pick up dry debris from the floor prior to wet cleaning. The microfiber yarn and corn row design grab and hold onto more dust without the need for dust mop treatment or other chemicals. The robust double stitched vinyl backing is very durable providing years of service when properly maintained. Because daily maintenance is so important to the overall success, the yarn is purposely lower profile making it much easier to dry groom the mops quickly and easily.
