

DISINFECTANT 220

CLEANER AND DISINFECTANT

Disinfectant 220 is the latest in disinfectant cleaning technology, formulated to disinfect an impressive list of microbial pathogens with reduced contact times when compared to other disinfectants. It is effective against a wide range of bacteria and viruses, including *Pseudomonas Aeruginosa*, *Staphylococcus Aureus*, HIV-1, HBV, HCV and Canine Parvovirus. It also qualifies for Emerging Viral Pathogen Claims against Enveloped Viruses, Large non-enveloped viruses and Small non-enveloped viruses. A full list of microbial claims can be found on a companion literature sheet.

DISINFECTANT 220 QUALIFIES FOR EMERGING PATHOGEN CLAIMS AGAINST:

- Enveloped viruses
- Large non-enveloped viruses
- Small non-enveloped viruses
